

Capability Statement

Albatross Technology Group is a service-disabled veteran-owned design-build contractor for communications and low-voltage infrastructure. We engineer, furnish, and subcontract installation of structured cabling, fiber optics, wireless, security and access control, and audiovisual systems for federal, state, and commercial facilities, including data centers. Our team handles design, procurement, installation, testing, and as-built documentation.

Core Capabilities

Physical Infrastructure Design and Support

Comprehensive design-build services for advanced systems.

Structured Cabling

Security Systems & Access Control

Fiber Optics

Wireless Networking

Audiovisual Systems

Engineer, Furnish & Install (EF&I)

Engineered designs, materials, and professional installation for inside and outside plant environments.

Deployment & Network Design

Installation & As-Built Drawings

Supply Chain & Procurement

Product Selection

How We Deliver Value

1

Design-Build, One Accountable Team

Design, procurement, installation, and closeout under one contractor, reducing handoffs and schedule risk.

2

RCDD-Led Engineering

Systems designed by a BICSI RCDD to industry standards and local code

3

Certified Suppliers We Contract With

COMMSCOPE®

Belden

PANDUIT®

FLUKE networks

Available As SDVOSB Subcontractor Or JV Partner

We support small business subcontracting goals

Company Summary
